IEEE Interface

Selecting interface card for use with GDS hardware

1. Introduction

GDS Windows 95/98/Me/2000 software uses the National Instruments PCI-GPIB interface card to communicate with GDS GPIB hardware using NI-488.2 communication. The interface card can be purchased from GDS or directly from your local National Instruments supplier.

2 N.I. GPIB Interface Card Part Number

To order your interface card directly from your local National Instruments supplier quote the following part number:

777158-01 PCI-GPIB and NI-488.2 for win 95

This interface card takes up one of the PCI slots inside your computer.
