

Commissioning and Quality Engineer

Do you have experience working in engineering environment, preferably materials, electronics or mechanical?

Do you have the confidence to work with electronic/electrical components and systems.?

Are you a team player with a proactive can do attitude?

Who are GDS Instruments?

GDS have been at the forefront of designing computer controlled systems to evaluate the mechanical properties of soil and rock for over 40 years and are highly regarded within the geotechnical and earthquake engineering design sector. We take pride in our company mission and vision statements which underpins our core staff values as we work together to be the best in our field.

Our Mission:

Dedicated to exceeding customer expectations by providing quality, service and on time delivery whilst listening to our customers needs.

Our Vision:

To be the world leader in advanced software controlled geotechnical laboratory systems.

Purpose of the role:

The C&Q Engineering role is key to ensuring our equipment is fit for purpose prior to reaching the end user. You will develop a detailed knowledge of our equipment and its operation. You will be expected to maintain a professional attitude with a high standard of personal presentation and excellent communication skills.

Responsibilities will include; Commissioning of products to the highest quality standards, ensure build procedures are followed and standards of work maintained, system assembly and QA testing, calibration, conduct repairs on and off site, preparation and maintenance of technical procedures and debug and problem solve issues.

Key requirements:

- Previous experience in a similar environment
- A degree or HNC in a related engineering field is an advantage.
- A basic understanding of electronic/electrical components and systems.
- Ability to think logically and fault find software, mechanical and electrical issues.
- Previous experience or knowledge of sensors, transducers and electro-mechanical systems would be an advantage.
- Ability to read and interpret engineering drawings, schematics, plans and specifications would be an advantage.

Employee Benefits:

GDS continuously strive to introduce new ways to ensure that our staff have a great work / life balance.
